-CARACAS-

LANDMARKED NATURALLY

Caracas, is a vibrant metropolis located in the center of the Americas. Its irregular geography makes the scenery magic, and adds to the city a variety of activities that integrate the urban and the natural. Enjoying its architecture, gastronomy, modern art, or its special climate, exuberant tropical vegetation and nearby beaches, is part of this amazing experience.

Some touristic Caracas magical (and fundamental) tips: 1. Dress simply. 2. It's a daytime city; and las but not least 3. Take only hotel or shopping mall cabs only.
