

AZORES

all year round

CORVO

The smallest island in the archipelago. One of the most visited for birdwatching. You can also take a boat trip around it or go on an excursion to Flores with dolphins or whales.

FAYAL

Whales in sight! Between resident and migratory species, common and uncommon, up to 24 different species of cetaceans can be spotted here.

FLORES

Crystal clear waters ideal for diving: bays, extensive caves, crevices and caverns. Plan an unforgettable dive at Gruta do Galo.

GRACIOSA

Don't miss Furnado Enxofre (the sulphur cave) and the chance to descend into the interior of a volcano.

PICO

History is written all over this island and you can read it in the Azores Geopark. You can also enjoy its UNESCO World Heritage wine landscape.

SÃO JORGE

An island for long walks. Remote villages only accessible by foot. Cliffs, canoes and speciality cheeses.

SANTA MARIA

White sand beaches, surfing, vineyards. The best antidote to stress and hurry. Excellent diving at Baixa do Ambrosio and Formigas.

TERCEIRA

Hills, lakes, golf and peace. Biscoitos is famous for its volcanic white wine, and Angra do Heroísmo united the world's great civilisations for over three centuries.

SÃO MIGUEL

All roads lead to Ponta Delgada because San Miguel has it all: whale watching, kayaking, thermal baths, pineapple and tea plantations (the oldest in Europe). Don't miss: Sete Cidades and the Furnas Volcano Crater.
